

LOUD
OF SWEDEN

simply sound

Simply sound

Loud of Sweden develops wireless audio systems that pair professional quality with easy installation, enabling complete freedom in public spaces for a simplified sound experience.

Why choose Loud of Sweden?

Easy Installation

The Loud of Sweden system is mounted and powered using standard lighting tracks, offering the flexibility of wireless sound with quick and easy installation. Music can be played from any device, and a variety of additional options are available.

Designed by installation specialists, it is easily convertible and extendable to cover additional or more expansive spaces.

Expandability

The Loud of Sweden system is scalable and can be used in any configuration. Multiple units of satellite and subwoofer can be used together, along with additional repeaters and transmitters, to provide seamless and limitless sound in large spaces.

Swedish Design

Music has the power to transform a space, and should stand out more than the system behind it. Our products, designed in Sweden, provide the highest quality sound and blend into any existing retail environment with multiple color options.

Complete Sound Freedom

With our unique Local Gateway frequency for transmitting wireless sound, this system is free of interruptions. By operating on its own unique frequency, the range is nearly limitless at up to 1000 meters without obstruction.

Sound for professionals, by professionals

Loud of Sweden is founded by experts in the audio for public spaces industry. Company experience extends from technical knowledge and electronic product development to years of sales and installation services. Our deep understanding of the market led us to develop this B2C audio system to better **fit the unique needs of installation specialists in retail and hospitality environments. One that offers flexible placement options with uncompromised sound quality.**

Our products
